

Law Clerks

Laner Muchin provides opportunities for law students to work throughout the year. This is a great benefit for the students because the labor and employment course offerings available in law school are often very limited.

Students find that the experience they gain at Laner Muchin broadens their understanding of labor and employment law and helps them learn how to apply the law in a very practical way. It also helps them define their career goals, before they have to make serious commitments.

Our law clerks provide valuable support to the Firm and our clients. They allow us to minimize costs to clients for basic research issues, while ensuring high quality of work through the supervision of our experienced attorneys.

We also rely on our law clerk program as an important recruiting and developmental tool. Many of our attorneys were offered associate positions based upon their outstanding performance as law clerks.
